

Aliya is the President of the Clean Economy Project (CleanEcon), a nonprofit initiative that unleashes clean energy innovation to power a new era of economic growth and shared prosperity. Prior to launching CleanEcon, Aliya led the policy team at Breakthrough Energy, the organization founded by Bill Gates to advance policies that accelerated clean tech innovation and deployment. During her tenure at Breakthrough, she also served as the interim Executive Director for Invest in Our Future (IOF), a collaborative of more than a dozen philanthropies to ensure that federal clean energy investments strengthen communities.

Aliya has more than twenty years of experience in the energy and climate field, with deep experience in policy development, political strategy, communications, coalition building, and policymaker engagement. She has served in several national and international environmental organizations, including as the Federal Climate Policy Director at the Natural Resources Defense Council (NRDC). She holds a master's degree in environmental management from the Yale School of the Environment, and a bachelor's degree from Cornell University. She lives in Washington, DC with her husband and her two spirited children.
