Asal Mehditabrizi is a Ph.D. candidate in Transportation Engineering at the University of Maryland, College Park. Her research focuses on transportation choice behavior, with a specialization in Electric Vehicle (EV) adoption. Currently, she is developing a methodological framework for analyzing EV refueling behavior. Her work aims to devise data-driven strategies for optimizing charging infrastructure and promoting sustainable transportation. Connect with Asal on LinkedIn [Asal Tabrizi] or view her profile at the ITS-ITE UMD Student Chapter.
